## Using Your Dental Blue Gold Plus Plan

Regular dental visits do much more than make your teeth look good. Through routine check-ups, minor dental problems can often be diagnosed and treated before they become major problems. Your dentist can also detect the first signs of serious health problems, like heart disease and diabetes. That's why BC Life & Health Insurance Company created the Dental Blue Gold Plus Plan, with 100% coverage for in-network preventive and diagnostic services.

**Choose a Dentist.** The Dental Blue 300 Network in California includes more than 18,000 quality dentists and specialists — like oral surgeons, periodontists and endodontists. You can visit any of these dentists at any time, and you don't have to deal with claim forms. Plus, you can visit any Dental Blue specialist without a referral.

**Choose Savings.** You get the greatest savings on all services when you visit a dentist in the Dental Blue 300 network. You can also visit a non-Dental Blue dentist, but your costs will likely be higher.

**Keep on Saving.** You can continue to take advantage of our discounted fees even after you've reached your annual maximum and on services that may not be covered by your plan, such as teeth whitening, implants and TMJ, when you visit Dental Blue dentists.

If you have any questions, please call Dental Blue Customer Service at **(888) 315-2049**.

To find a Dental Blue dentist or specialist online, go to **bluecrossca.com** and select Find a Doctor. Then follow the prompts to find a provider near you.
